

CUTISS AG is a biotech spin-off company of the University of Zurich (UZH) that was awarded the winner of the Top100 Startups 2020 and focuses on the development of personalized bioengineered skin graft products for the treatment of skin defects. Its lead product denovoSkin™ has successfully completed Phase I in pediatric patients. Clinical Phase II studies are underway in Europe and Switzerland.

CUTISS AG aims at designing an intelligent, automated platform to accelerate the manufacturing of its bioengineered skin product. Therefore, we are seeking a highly dedicated

GMP Manufacturing Associate (f/m/d) 100%

who can support the development of next-generation skin grafts and start **November 1, 2020 or sooner**.

Your main duties

- Production of autologous skin substitutes for phase II clinical trials according to SOPs and GMP guidelines in the cleanroom facilities,
- Support of the production team in the validation of analytical methods, production processes and equipment qualifications,
- Participating to the further development of the product and the production processes.
- Involvement in the generation and review of the GMP documentation, together with the warehouse and laboratory management.
- Active support with the technology transfer from Wyss Zurich to CUTISS' cleanroom facilities.

Your background

You hold a B.Sc. or M.Sc. in a biological field (e.g. biology, tissue engineering, biotechnologies, and biomedicine) or a comparable education. Practical experience (1+ years) working with mammalian cell cultures are a must and strong aseptic working skills are particularly advantageous. Ideally you also have some experience in GMP environment.

Desired Skills and Experience

- Solid practical background in Mammalian Cell Culture
- Knowledge of GMP regulations is highly desired
- Attention to detail with excellent organizational and record keeping
- Great sense of quality and responsibility
- High level of accuracy and organizational skills
- Demonstrate ability to work independently and efficient
- Self-reliant in determining priorities
- Excellent interpersonal skills and team-oriented attitude
- Proficient in English, German is nice to have and any other languages are a considered a plus

Place of work

In the first months the working time is split between the laboratories and offices in Zurich and Schlieren. In the course of 2021, the place of work will permanently move to Schlieren.

We offer the unique chance to be part of a young and motivated project team with the vision to change the patients' quality of life. This interesting and challenging job will give you the opportunity to further develop your working skills in a biotech start-up environment and to get in touch with international partners and clinical trial centers. In summary you can expect:

- A high pace start-up environment
- flexible working hours in arrangement with the team leader
- competitive benefit package
- a young and dynamic team
- 5 weeks of holidays

Special remarks

This position requires occasional weekend on-call duties and as it also includes working with human cells, we ask our employees to be vaccinated for Hepatitis B or be willing to do so (vaccination cost will be absorbed by CUTISS) in order to protect them from potential infections.
